Maps Showing Outcrop Boundaries of Principal Coal Seams.

1. Lawrence, Gallia and Jackson Counties, (in part.)
2. Jackson, Vinton, Meigs and Gallia Counties, (in part).
3. Hocking, Perry, Athens and Vinton Counties, (in part.)
4. Muskingum, Licking, Perry and Morgan Counties, (in part).
5. Coshocton and Holmes Counties.
6. Tuscarawas, Harrison and Carroll Counties, in part).
7. Columbiana, Jefferson and Carroll Counties, (in part).
8. Guernsey and Stark Counties, (in part).
9. Pittsburgh and Meigs Creek Coal Seams.
10. Coal Fields of Ohio.

SCALE — Maps 1–9. Two miles = 1 inch.
Map 10. Ten miles = 1 inch.

NOTE.—It is not attempted in these maps to indicate the extension of coal seams below their natural drainage except in a few instances which are duly noted in the text. All the seams of the state dip to the southeast or south and, consequently, some extension of each in the same direction is always to be inferred. When a coal seam is represented as included within the boundaries of a lower seam, the extension of the latter throughout the territory occupied by the higher seam is always to be inferred.

C.E. Sherman Chief Draftsman.
1892

NOTES.

THE PITTSBURGH COAL - is mapped in Jefferson, Harrison, Belmont, Guernsey, Athens, Meigs and Morgan Counties. A few outliers in Lawrence County are not represented.

THE MEIGS CREEK COAL - is mapped in Muskingum Guernsey, Noble, and Morgan Counties. Its extensions into Washington, Monroe, and Belmont Counties are not represented.

THE PITTSBURGH COAL - is believed to occupy, in addition to the areas indicated, the central and southern townships of Belmont Co. and, at least, the northeastern half of Monroe Co.; also, several of the southwestern townships of Washington Co, two of the southeastern townships of Athens Co. and the entire eastern half of Meigs Co.

THE MEIGS CREEK COAL - occupies considerable territory in northern Washington and eastern Monroe Counties.
